GENERAL PACKAGING EQUIPMENT CO.

LIQUIDS IN BAGS

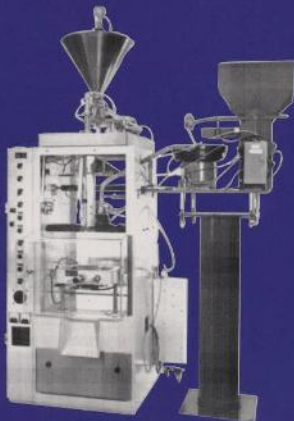

General offers a wide range of models to package liquids ranging from free flowing to heavy pastes; from 1 fluid ounce (30 cc.) to 1 gallon (4 liters); from clear to 1" solids in suspension; and from cool to 200F. Our 'C' series machines accommodate laminate packaging materials; 'P' series models accommodate unsupported polyethylene; and 'P/C' machines handle either type.

Current applications of Generals include soaps in bags with dispensing pumps for

restrooms; foil pouches of sterilized water for survival kits on trans-oceanic vessels; hot filled beans; meats; & sauces packaged at a restaurant chain central commissary; toppings and jellies in 2 lb. bags with endseals cut at 45 for use as pastry bags; reactants for both hot and cold packs; a freezer gel so viscous it can be carried in chunks, as well as many others. For more information on a model to meet your requirements for liquids in bags, please contact your local General representative or the factory.

MODEL 90LC
WITH POSITIVE
DISPLACEMENT PUMP

MODEL 80LC
WITH PISTON FILLER
(SHOWN WITH FITMENT
