LIQUIDS IN BAGS

Vertical Form Fill Seal Machines by
General

VFFS single tube and multi-lane models accommodate fill volumes from 1 ml to 3 gallons or 10 liters with free flowing to viscous products in pillow, 3 side seal, 4 side seal and square bottom bags.

General has manufactured VFFS machines for packaging liquids in bags for over 50 years. All of General's broad range of liquid fillers are designed and made in-house. General designs and builds applicators for caps, pumps, and other dispensing devices.
